Subject: BRYAN TEW COLLECTS, CATALOGUES AND HANDS OVER DIGITAL VOICE IMPRINT OF FOUR KNOWN GOVERNMENT PERPETRATORS TO RUSSIANS AND CHINESE IN LAST INTERACTIONa

I made certain to hand over the digital voice imprint, facial recognition and other electronic identification of Matthew Arnegard, Sean Andrews Katherine Horton and Ella to the Russians and Chinese as I last interacted with them which the American Government ALREADY knows for two years.

At least three of them are now probably in some degree of danger. Have fun on your next International Vacation Ella, Katherine, Matthew and Sean. The hunters have become the hunted.

If you ever once consumed Russian Vodka then the Russian Nanotechnology is already in your body and brain which the Russians can activate by targeting you from thousands of miles away by establishing TIMING & LOCATION:
